

ANGAZA SHADOW TALLY — EVIDENCE CERTIFICATE

Civic evidence record · independently verifiable · content-addressed

This is Evidence Record Version 2, issued as a correction to a previously issued certificate for this submission. The prior version was not deleted — it remains independently retrievable and is marked superseded, not replaced.

Polling Station

Station Name: Mbora Primary
Station Code: 018091045503501
Electoral Area: Nyandarua › Ol Kalou › Mirangine

Submission Details

Submission ID:
cmrpcsa3100pi10oonn1zz5yy
Submitted At: 17 July 2026
22:51 EAT
GPS Coordinates: -0.210000,
36.250000
Confidence Score: 55/90
Scoring Methodology: v1-
backfilled

Evidence Assessment

This is the exact component breakdown behind the confidence score above, from the same reconciled evidence snapshot that was anchored — not recomputed from current live data.

GPS Proximity: 0/20
Timestamp Proximity: 0/15
Document Validity (OCR + security features): 20/20
Number Plausibility: 15/15
Corroboration: 20/20
Total: 55/90

Certification Statement

This document certifies that photographic evidence of the official Form 34A at Mbora Primary polling station (018091045503501) was submitted through the Angaza platform (this submission cannot be individually attributed to a specific contributor — see note below) on 17 July 2026 at 22:51 EAT. The submitted evidence was processed by the Angaza verification pipeline, achieving a confidence score of 55/90 (see breakdown below). To preserve its integrity, the image was stored on the InterPlanetary File System (IPFS) under content identifier (CID) QmRWupTmDgv4ZGqXXGdt34ba4bSGd5V8t5ZPQ3FyajwByf, pinned by Angaza's storage infrastructure. A cryptographic record of this evidence was subsequently anchored on the Base Layer-2 blockchain under transaction hash 0xbc34a52cba639980b1fb52bef0f3985e3904508ff3f671e08926d80f8c683b8b at 22:12 EAT on 20 August 2026. Once anchored, this record is tamper-evident: it cannot be modified without invalidating its cryptographic proof, and any such modification would be detectable through independent verification against the anchored record.

Correction Note

Certificate printed the stale submission-level score; corrected to the anchored station-level score

Note: this submission has no linked contributor declaration, so it cannot be individually attributed to a specific person. This affects source attribution only — see "Evidence integrity vs. source attribution vs. physical authenticity" note below — and does not affect the cryptographic integrity of the stored evidence.

Disclaimer

This certificate confirms the existence, integrity, and timestamp of the submitted evidence as recorded by the Angaza platform. It does not constitute certification of the accuracy of the election results contained in the submitted image. Verification relates solely to the authenticity, preservation, and traceability of the digital evidence.

In particular: evidence integrity (that the stored artefact is the same digital artefact originally submitted) is established via its content-addressed IPFS CID and the Base blockchain anchor above — any change would produce a different CID, detectable independently. Source attribution (who submitted this evidence) is established only when a contributor declaration is present above; otherwise this submission cannot be tied to a specific individual. Physical authenticity (that the photographed document is a genuine, unaltered polling-station form) is not established by this certificate alone — that requires the corroboration and dispute-review evidence considered alongside it.
